Draft Detailed Procedure for Functions of Cyber Security Coordination Forum

Comments from NCIIPC:

| S. No. | Stakeholder/Comment | Grid-India Remarks |
|--------|--|--|
| 1 | <p>The roles and responsibilities of the committees to be constituted at central and regional level are more focused towards capacity building, compliance monitoring, incident management and sharing best practices rather than focusing on cyber security challenges and gaps. Therefore, it is suggested that the roles and responsibilities of the committee should be more focused on identification of the cyber security challenges & gaps such as presence of obsolete technologies/ End of Life/ End of support issues etc. and deliberating on the solutions thereof to overcome these gaps and challenges. Following roles and responsibilities may also be considered: -</p> <ul style="list-style-type: none">a. Cyber security challenges & gaps faced by the stakeholders,b. Cyber security initiatives taken by stakeholders to mitigate these gaps and challengesc. Emerging threats, challenges and solution for mitigation | <p>Necessary modification on the draft procedure has been made to have more stress upon the function for deliberation on Cyber Security Challenges and Gap Analysis has been done.</p> <p>It may be appreciated that implementation of cyber security best practices requires resource adequacy, suitable knowledge sharing platform, awareness of advanced technologies and strong policy frameworks. Role of coordination forum therefore also includes deliberation and directions in these issues so that the expertise of the members can be harmonized and best utilized in development of the cyber security maturity of Grid Operation Sector.</p> |
| 2 | <p>CERC regulations are applicable to all the Sectoral CERTs. CERT-Transmission, CERT-Thermal, CERT-Hydro, CERT-RE and CERT-Distribution also needs to form Cyber Security Coordination Forum to coordinate and deliberate on the cyber security challenges and gaps. Therefore, it is suggested that all sectoral CERTs in consultation with CSIRT–Power shall formulate a consolidated SOP for Cyber Security Coordination Forum which will be applicable across the Power Sector</p> | <p>As per mandates received this procedure has been framed for CERT-GO Sector keeping in view the requirement of Grid Operation domain.</p> <p>Hon’ble commission may like to review the comment received from NCIIPC.</p> |
